## App Inventor

App Inventor is a tool that enables users to develop their very own Android applications. These applications can be downloaded straight onto Android devices or even uploaded to the Play store where it can be purchased or downloaded for free by users across the World! App Inventor has released an updated version of the software, however the first version can still be accessed and used as a fun, learning tool within classrooms or at home.

### Skills

- Problem Solving
- Communication and Logic
- Improving Own Learning and Performance
- Working with Others
- ICT
- Numeracy
- Creativity

### Key Learning Outcomes

- Programming basics
- App Development and design

### Workshop Outline

- App Design elements
- App Inventor interface
- Programming skills using the drag and drop environment on the blocks editor.

### Why Technocamps?

Technocamps is an exciting project that provides free workshops to young people on programming, robotics, game design, app development and much more... It is about getting young people (11-19) in Wales excited about Computer Science and STEM and challenging them to think about the world around them in a different way.
